

# Brandon Township

Douglas County, Minnesota

## Dust Control

Brandon Township will contract to apply chloride for dust control on township gravel roads at the request of property owners. Property owners must make the request in writing to the township clerk in spring following the public announcement. An ongoing request is kept on file via the past year's billing unless the owner requests a change in status.

Property owners will be billed one-half the cost for the first 300 feet of roadway bordering the property plus full cost of any additional footage

Flagging of the boundaries where chloride is to be put down is recommended.

Adopted June 15, 2020
